

Educators Nationwide Praise Hotmath!

“**Hotmath empowers students to become independent learners.** Good students can get a ‘hint’ to help them finish assigned problems and to explore additional problems that interest them, and **students who struggle with math have a tutor in their own home!**”

*Ann Conaway
National Board Certified Teacher / Mathematics Dept. Chair
Palisade High School, CO*

“**Hotmath** is extremely helpful in answering questions for my students when they are at home. **It cuts down on the question and answer period during class, leaving me with more time for instruction!**”

*Jill McBride
Teacher
Saddleback Christian Academy, CA*

“**Hotmath** has been an outstanding reference for my students. Many of them have commented on the great help Hotmath gives them at home, and **parents have told me that this is a valuable reference for them, too.**”

*Brian Fleischman
7-12 Math Teacher / Math Chairperson
Cedar Bluffs Public School, NE*

“My **students LOVE using Hotmath** to help them with their algebra homework. I teach advanced students who want to do well and **learn how to work out the problems**, not just use the odd answers from the textbook.”

*Renee Munsey
Algebra 1 and Math 8 Teacher / Math Department Chair
Roanoke County Schools, VA*

“**Hotmath** has given us an opportunity to give home tutoring to students and parents in a subject area both seem to dread. **The step-by-step process showing how to solve each problem is especially helpful.**”

*Steve Sherry
Teacher – Grade 6
Del Cerro Elementary School, CA*
